Powerful

Lockheed Martin is using Green Hills Software's INTEGRITY®-178

RTOS and AdaMULTI™ IDE to develop safety-critical and security-critical software for the F-35 Joint Strike Fighter (JSF). Lockheed

Martin's design for the JSF was selected by the Department of Defense

(DoD) in a \$200 billion award, the largest in US DoD history. Avionics

software developed by Lockheed Martin is running on INTEGRITY-178

in multiple airborne, Power Architecture-based systems.
